Food service and payment schedule

Services: chilled meal preparation and delivery to customer sites. Payment terms: Net 30 days after accepted delivery. The receiving team records acceptance after temperature and quantity checks; invoice issue alone does not start this period.

Cold-chain dispatch records accompany each delivery. This schedule describes the contracted service and payment trigger; it is not a laboratory result or a statement of shelf life for every menu item.

Records and correspondence

Procurement requests the menu, site schedule and receiving instructions separately. Food allergen declarations must be obtained for the relevant menu; this supplier registration form does not list them.

Liability cover is described in the separate insurance certificate and attached amendments. Registration particulars do not decide which insurance endorsement takes precedence.
