

Certificate of Liability Insurance

Liability certificate and schedule

Certificate of Liability Insurance. Named insured: Udaya Equipment Maintenance Private Limited.
Insurance provider: HarborPoint General Insurance Company Limited. Policy number:
HPGL/2026/ST/24005. Policy period: 01 JUL 2026 - 30 JUN 2027. Country: India.

Declared business activity: Industrial pump and rotating-equipment maintenance. This liability original is supplementary procurement evidence. Its attached schedules explain applicable operations, limits and conditions; a certificate heading alone does not replace those clauses.

The evidence records the supplier's stated cover; it does not confirm customer onboarding approval or guarantee payment of a claim. The policy schedule and endorsements must be read together when an operation is subject to a particular limit or condition.

Certificate of Liability Insurance

Public liability and deductible

Public-liability occurrence limit: INR 35,00,000. Per-claim deductible: INR 50,000. These apply to declared maintenance activities subject to the schedule's stated conditions.

Routine servicing does not expand the occurrence limit. The deductible is borne per claim and must not be reported as the policy limit.

Certificate of Liability Insurance

Hot-work extension

Hot work is covered only when a hot-work permit is issued before work and a fire watch remains present for 60 minutes after completion. Both conditions are mandatory for this extension.

Work with a permit but without the required post-work fire watch is excluded from the hot-work extension. This evidence does not contain an issued hot-work permit for a particular customer job.

Certificate of Liability Insurance

Electrical-work exclusion

Live electrical work is excluded. De-energised work is permitted only after documented isolation and a verified lockout record. A verbal statement that power is off is not the required record.

This schedule gives cover conditions, not authority to perform a customer job. It contains no approved job permit, external compliance approval or guaranteed repair completion time.
