

Certificate of Liability Insurance

Liability certificate and schedule

Certificate of Liability Insurance. Named insured: Varsha Facilities Services Private Limited. Insurance provider: HarborPoint General Insurance Company Limited. Policy number: HPGL/2026/ST/24003. Policy period: 01 JUL 2026 - 30 JUN 2027. Country: India.

Declared business activity: Facilities helpdesk and housekeeping. This liability original is supplementary procurement evidence. Its attached schedules explain applicable operations, limits and conditions; a certificate heading alone does not replace those clauses.

The evidence records the supplier's stated cover; it does not confirm customer onboarding approval or guarantee payment of a claim. The policy schedule and endorsements must be read together when an operation is subject to a particular limit or condition.

Certificate of Liability Insurance

Scanned liability limits

Public-liability limit: INR 15,00,000 per occurrence for declared facilities work. The deductible is INR 20,000 per claim; the deductible is not the cover limit.

Care, custody and control of customer property is subject to an INR 3,00,000 sublimit. This property sublimit does not replace the public-liability occurrence limit.

Certificate of Liability Insurance

Working-at-height condition

Work above three metres is covered only when a site permit is issued before the work starts. Work without that permit is excluded from the declared working-at-height extension.

The customer issues site permits under its own controls. No issued permit is contained in these originals, so permit compliance for a particular job is not established by this certificate.
